## INTRODUCTION

Any Who's Who must be revised from time to time in order to continue its usefulness as a reference work. Hence the necessity of this, the third issue of a Who's Who of the Chaplain Corps of the United States Navy. The first Volume appeared in 1948 and was designed to be Volume III of the series on the HISTORY OF THE CHAPLAIN CORPS, U. S. NAVY. Actually it was published before Volumes I and II and did not, therefore, bear the designation of Volume III. That volume included the sketches of 3,353 chaplains who saw duty in the Continental or the U. S. Navy down to the end of 1945. The second Who's who of the Navy Chaplain Corps was published in 1953 and contained corrections and additions to 1,555 sketches which appeared in Volume III plus the sketches of 273 chaplains who had active duty from 1 January 1946 to 31 December 1952, together with the sketch of Edward Brooks, a Continental Navy chaplain whose record was discovered after the publication of Volume III.

This present volume was needed to give the biographical and service-record sketches of 574 additional chaplains who had joined the Corps down to 30 June 1957, corrections and additions to 2,227 sketches previously published, to the same terminal date, and such information as is known about a Continental Navy chaplain, John Reed, whose record has recently been discovered. This means that this volume carries references to 2,801 chaplains and majors upon the period marked by the terminal date of Volume IV, 31 December 1952, to 1 July 1957. These three volumes refer to a total of 4,203 Continental or U. S. Navy chaplains for the period 1776 to 1 July 1957.

A conscientious effort has been made to complete all of the 3,627 sketches published in Volumes III and IV. After separating the names of all chaplains therein listed who are still on active duty, on the retired list, or on the Reserve list, there remained a residue of 744 names of chaplains who had been separated from the Corps. A check was made on each of these names to determine the cause of separation. The results have been incorporated in the analysis of the 2,801 sketches contained in this volume which fall into the following four categories:

1. Active duty chaplains as of 1 July 1957, totaling 813. Of this number 262 have their biographical and service-record sketches appearing for the first time. The sketches of 551 chaplains, whose records appeared in either or both Volumes III and IV have been corrected where needed and brought up to date. Since these chaplains were on active duty at the terminal date of this present study and since it was desired to make this volume complete as a reference volume for the Corps as it is now constituted, the biographical and service-records of such chaplains have been given in full.

2. Ready and Standby Reserve chaplains totaling 1,098. Volumes III and IV did not include the names of Reserve chaplains who had not had active duty beyond short periods of training. This volume adds this feature. An analysis of

the districts to which these 1,098 Reserve chaplains belong gives the following table:

District #	1-63	9-231
	3-129	10-3
	4-162	11-66
	5-62	12-39
	6-142	13-24
	8-90	PRNC 18

Abroad, unclassified, or in transit-69

After 1 July 1956 the administration of the Potomac River Naval Command Reserve chaplains came under the 5th District.

The Armed Forces Reserve Act of 1952 (Public Law 476, 82nd Congress) defined the Naval Reserve as being composed of the Ready, the Standby, and the Retired Reserve, thus indicating three degrees of vulnerability in case of the necessity of recall to active duty. No effort has been made in this study to sub-divide the Reserve chaplains into the separate categories of Ready and Standby. Of the 1,098 Reserve chaplains here listed, 186 of those who joined the Corps in 1946 and years following have not had any active duty beyond possible short periods of training. The sketches of these 186 chaplains give only rank and date of commission, denominational affiliation, and Naval District when known.

3. Retired chaplains, both Regular and Reserve, totaling 147. According to Public Law 476, above mentioned, Reserve officers who had reached the age of thirty-seven and who had served in the Naval Reserve for a minimum of 8 years, including at least 6 months on active duty during a war or national emergency could be retired without pay. They would be subject to recall during full mobilization and on an involuntary basis if necessary. Following the enactment of this law, which became effective 1 January 1953, a Bureau of Naval Personnel instruction sent out to all Naval Reserve officers invited each to make a selection of the classification under which they wished to be listed. This resulted in many Reserve chaplains asking for retirement without pay. The Naval Districts of all such chaplains are indicated in their sketches when known. No effort was made to determine the number of Regular and Reserve chaplains who have been retired with pay. Such information can be found by consulting the most recent issues of the *Naval Register* for USN and for USNR.

4. Chaplains separated from the Corps, totaling 744. Of this number 37 were reported to have died; 381 resigned; 326 were dismissed or discharged; and one transferred to another Corps. In some cases the date of death came after the formal separation from the Corps. As mentioned above, all Reserve officers were given an opportunity under Public Law 476 to indicate their continued interest in the Chaplain Corps by electing one of the available categories to which they wished to belong or to resign. Failure to respond to this invitation was considered to be evidence of a lack of interest. The names of such officers, including chaplains, were referred to a Reserve Office Disposition Board and after due consideration such offi-

cers were discharged. This accounts for most of those herein listed as being discharged. The word is used without prejudice.

A few chaplains who served during World War II were released from active duty because of physical disability or for some other reason. The abbreviation used in Volume III was "Rel" which meant "Released from active duty." Actually these chaplains concerned had then resigned or were discharged. For the sake of accuracy, such records have been amended or corrected in this volume.

In general, the content and style of the sketches follow the pattern used in Volumes III and IV. (See pages 16 and 17 of Volume IV.) The following symbols have been used before some names:

- \* denotes a chaplain who has died,
  - # indicates that the chaplain is listed in Volume III,
  - # # indicates that the chaplain is included in Volume IV.
- If a chaplain has been included in both volumes, only the

double symbol will be given. Volume IV will then indicate whether or not he was mentioned in the previous volume. No symbols will be used for active duty chaplains whose service record stretches back through the periods covered by Volumes III and IV, as their full sketch is here repeated.

No effort has been made to list the Ensign Probationaries, CHC, who have not been commissioned LTJG.

Appendix A of this volume contains an ecclesiastical listing of new accessions to the Corps since 1 January 1953 (with a listing of Reserves who have not had active duty back to 1 January 1946). Appendix B gives a chronological listing of these new accessions.

All who note errors in the sketches or in the statistical tables are invited to send corrections to the Chief of Chaplains, Chaplains Division, Bureau of Naval Personnel, Washington, D. C. Such corrections will be noted for future reference.

## APPENDIX A

### INDEX OF ECCLESIASTICAL AFFILIATIONS

The following table gives the religious affiliations in Column A of 3,353 chaplains whose sketches appeared in Volume III of this series; in Column B of 274 chaplains whose sketches are found in Volume IV; and in Column C of 574 to whom reference is made in this volume. This makes a grand total of 4,201 Continental and U.S. Navy chaplains whose biographical and service-record sketches have appeared in one or more of these three volumes.

A more detailed breakdown of ecclesiastical affiliations is given in this volume than was true of Volumes III and IV. Notice, for instance, the Lutheran statistics. However, no effort was made to go back and reclassify the names previously listed under some general category. The name of George A. Jacobs was included in Volume IV under the listing of "Catholic" when he should have been included under "Disciples." With the exception of this correction in the above table, the statistics here given are the same as those which appeared in Volumes III and IV.

The year date following the chaplain's name in the denominational lists indicate the year in which the chaplain was first commissioned a Navy chaplain. The figures in parenthesis after the name of the denomination indicates the total within that classification.

## APPENDIX B

### LIST OF USN AND USNR CHAPLAINS ARRANGED ALPHABETICALLY BY THE YEARS IN WHICH THEY WERE COMMISSIONED

The following chronological list contains the names of 574 chaplains whose sketches appear for the first time in this volume. The figures within the parenthesis following the year date indicate the number within that classification. The list includes the name of the Continental Navy chaplain, John Reed.

The previous volumes of this series did not include the names of Reserve chaplains who had not seen active duty beyond short periods of training. However, because of the present importance of the Reserve program, the Chief of Chaplains wished to have all such chaplains listed briefly in this volume. Therefore, the chronological list goes back to 1946 when the first Reserves were received following World War II. All names with asterisks before them indicate Reserve

chaplains who have not had active duty with the exception of short periods of training.

All chaplains who had active duty who entered the Corps prior to 1 January 1953 are listed in either Volume III or IV with the following four exceptions: John A. Hawkins, Richard D. Hunter, Joseph A. Scharer, and George B. Taylor—all of whom were commissioned in 1946. Their names are, therefore, included in the following list.

The previous chronological listing of chaplains was largely by classes in the Chaplains' School. However, this plan could not be followed in this volume because some Reserve chaplains never attended the School or attended it some time after being commissioned. Also some attended the School as Ensign Probationaries who were not commissioned until a year or more passed.
